

Akeem Adeyemi

Senior full-stack engineer | Lagos, Nigeria

a.akeem@yahoo.com | [GitHub: akimzzy](#) | [LinkedIn: Akeem Adeyemi](#)

I've spent more than five years building software, including payment and security systems. I've also led frontend development and mentored engineers. I care about software that works well in everyday use and is straightforward to maintain.

Professional experience

Adventlabs

Feb 2026 - Aug 2026

Full-stack developer | Remote

I worked on Buzthrive, an inventory platform used across several African countries. I built subscription access controls and recurring billing with Flutterwave, then moved billing to Paystack after finding problems with automatic renewals.

I also integrated third-party APIs, maintained the platform, and worked on new features.

Crestbase

Aug 2025 - Jun 2026

Frontend developer to full-stack developer | Remote

I built web interfaces from Figma designs and connected them to backend services. I worked on subscriptions, virtual accounts, and features that let customers save towards property purchases while earning interest.

I also restructured and optimised parts of the backend to improve performance and make the code easier to maintain. Other work included admin and partner tools for hotels and property management.

Treadie Inc. | Onboardbase

Oct 2020 - Feb 2025

Frontend developer to lead frontend developer to full-stack engineer | Remote

I led frontend development from the first implementation through launch. I mentored frontend engineers, reviewed code, and worked on architecture and API design.

My backend work included end-to-end encrypted secret sharing with RSA and AES, plus usage tracking and subscription access controls connected to Stripe.

Freelance

Apr 2019 - Sep 2022

Frontend & full-stack developer

I designed and built about seven client projects. I worked directly with clients to understand what they needed and turn those requirements into websites and web apps.

Akeem Adeyemi | Selected work

Selected product work

Alluring Aura Scent

Full-stack development | Storefront & admin platform

I built the storefront and admin app for a perfume store, with Paystack payment verification, stock allocation in database transactions, and order management.

Next.js | TypeScript | PostgreSQL | Cloudflare | Paystack

alluringaurascent.com

QuikCity

Founder & product lead

I started QuikCity and built its food ordering and courier platform, including the vendor app, payments, vendor settlements, and rider payouts.

WhatsApp commerce | Payments | Monnify | Logistics

quikcity.co

Vendor app: app.quikcity.co

Onboardbase

Frontend leadership & full-stack engineering | Treadie Inc.

At Onboardbase, I led frontend development through launch and later built encrypted secret sharing, usage tracking, and subscription access controls with Stripe.

Frontend architecture | RSA / AES | Stripe | Subscriptions

[Company profile](#)

Buzthrive

Full-stack development | Adventlabs

At Adventlabs, I built subscription access controls and recurring billing for Buzthrive, then moved billing from Flutterwave to Paystack after problems with automatic renewals.

Multi-tenant SaaS | Subscription billing | Flutterwave | Paystack
